Offsetting moody shades with lighter tones adds dramatic depth to simple designs.

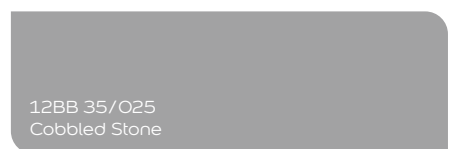

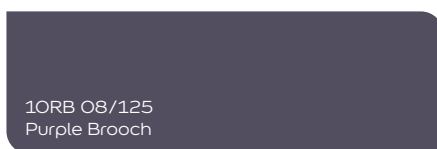

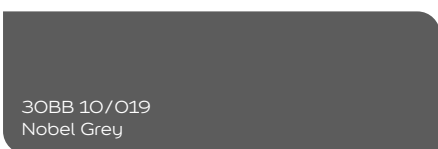

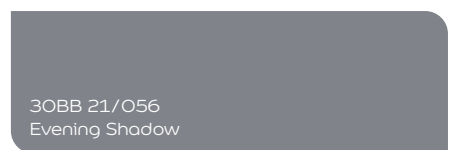

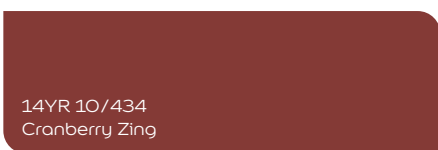

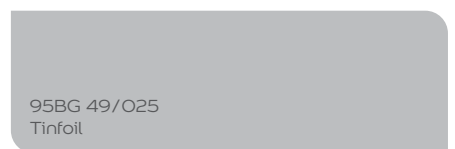

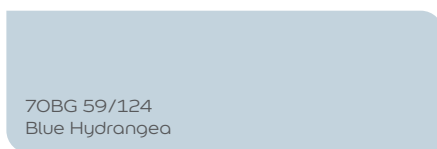

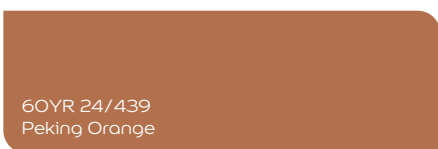

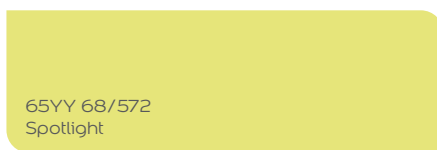

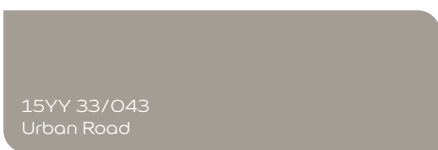

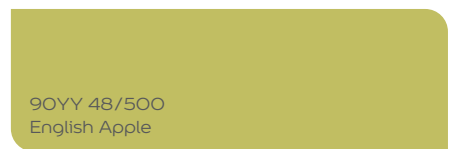

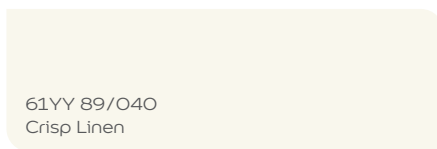

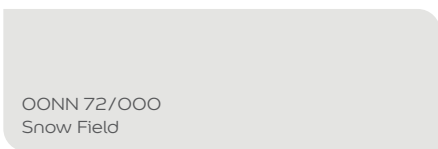

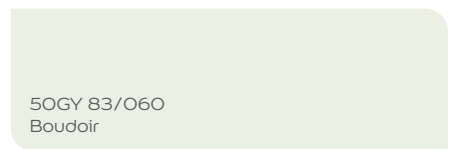

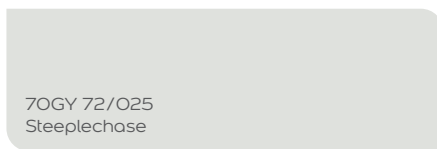

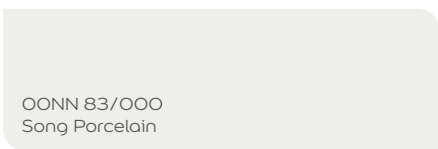

You can still make bold statements with simple colours. Pair mid greys and blues with delicate hues for a sleek and composed finish.

# MODERN TWIST

Showcasing captivating pops of colour, your home with a Modern Twist commands admiration from all angles. Alive with vibrant accents complemented by softer tones, the diverse palette enables creative expression of your personal tastes for a home that's bold yet at ease.

# Ultimate All-Weather Protection For Your Home

Dulux Weathershield® Powerflex™

Powerflex™ Technology stretches as much as 6x more\* to cover and prevent resurfacing of hairline cracks for superior crack and rain protection.

\* Compared to standard premium exterior paint

Dulux Weathershield®

Advanced Algae Fungus Guard protects 2x longer against algae and fungus attacks to keep walls looking good.

Dulux Weathershield® Roof

Thick, elastic waterproof coatings protect roofs against cracks and prevent roof leaks.

Dulux Weathershield® Flash

High Bond Technology combines the benefits of paint and sealer in one product to achieve superior all-weather protection faster, saving time\*\*.

\*\*Dulux Weathershield® Flash 2 coats system versus conventional 3 coats system.

All Dulux Weathershield® paints contain Keep Cool™ Technology. Heat from sunlight is reflected to reduce exterior wall surface temperature by up to 5°C.

Tiny hairline cracks cannot be avoided, as concrete walls cure and dry; these are also caused by slight movements on the ground and extreme changes in the weather. Through these cracks, rain and moisture seep in, damaging the walls which results in peeling, mould and ugly patches.

Give your home the ultimate protection with  
**Dulux Weathershield Powerflex™**

**SUPERIOR  
 CRACK PROOF**

Paint film latex stretches as much as 6x more than conventional premium exterior paint  
 Covers and prevents resurfacing of hairline cracks

**RAIN  
 PROOF**

Superior rain resistance  
 Covers cracks so rain and moisture cannot seep in

**Weathershield  
 Benefits**

**Advanced Algae Fungus Guard** Over time, algae and fungus attacks damaged walls and leave stained, uneven patches. Advanced Algae & Fungus Guard prevents such damage with 2x longer protection, compared to conventional exterior paints. It delivers superior protection against algae & fungus to keep walls looking good.

**Keep Cool** Keep Cool™ Technology reduces exterior wall surface temperature by as much as 5°C with special pigments to deflect infrared rays. It keeps the heat out and interiors cooler so energy is conserved while comfort is uncompromised within the home.

*Disclaimer: Keep Cool™ up to 5°C applicable to selected colours.*

**Stay Clean** Ordinary elastomeric paints stretch to cover hairline cracks. However, dust and dirt stick on the paint film, making the wall look dirty more quickly. Powerflex™ Technology resists dirt and dust better than other elastomeric paints, allowing rainwater to wash these away more easily. Exterior walls look fresher looking for longer.

*Disclaimer: When wet mud dries on the wall, this results in stains and discolouration. To prevent this, clean the wall thoroughly with water before the mud dries off.*

# SEE SHARE PAINT

with Dulux Colour of the Year 2019

Try free Dulux Visualizer app to see how Spiced Honey will transform your walls. And before you make your decision you can share your favourite new-look room shots with your friends and family.
